Professional Summary

Flutter Developer with 2+ years of experience building scalable, cross-platform iOS and Android applications. Skilled in Flutter, Dart, state management, REST APIs, Firebase, and clean architecture, with a strong focus on responsive UI, performance, and maintainable code. Experienced in delivering 6+ mobile applications across e-commerce, property rental, productivity, healthcare, music, and service-based domains.

Education

COMSATS University Islamabad

Bachelor of Science in Computer Science

Feb. 2022 – Jan. 2026

Islamabad, Pakistan

Relevant Coursework

- | | | | |
|--------------------------|---------------------|---------------------------|-----------------------|
| • Mobile App Development | • Programming | • Algorithms | • Database Management |
| • Object-Oriented | • Data Structures & | • Web Development | • Machine Learning |
| | | • Artificial Intelligence | • DevOps |

Experience

Carbonrepro

Flutter Developer

Texas, USA

- Developing and maintaining production-grade Flutter applications for real-world business use.
- Integrating AI agents, REST APIs, and backend services to deliver intelligent application features and seamless data communication.
- Collaborating with cross-functional teams using Git, code reviews, testing, and Agile workflows to deliver reliable, high-quality mobile applications.

Nexar Solutions

Flutter Developer Intern

Islamabad, Pakistan

- Assisted in developing cross-platform mobile applications using Flutter and Dart.
- Collaborated with senior developers to implement responsive user interfaces and core application functionalities.
- Gained practical experience in REST API integration, state management, and Firebase services.
- Participated in code reviews, debugging, and performance improvements to enhance application quality and user experience.

Agorah Solutions

Junior Flutter Developer

Islamabad, Pakistan

- Developed and shipped production-ready Flutter UI modules from Figma and design specifications under senior developer review.
- Improved application stability by resolving bugs and crashes while optimizing SQLite and Provider-based data flows.
- Strengthened code quality through QA, reusable widget architecture, code reviews, and implementation of Flutter development best practices.

Projects

NeuralHub | *Flutter, Dart, Clerk, Cloudinary, AI Agent Integration, Python*

- Developed and maintained a production-grade Flutter application using a scalable and modular architecture for real-world business use.
- Integrated AI agents and RESTful APIs to deliver intelligent, automated features and seamless backend communication.
- Implemented responsive interfaces, optimized application performance, and collaborated in an Agile development environment to deliver high-quality releases.

RentSphere (FYP) | *Flutter, Dart, Node.js, Firebase, Google Maps API, REST APIs, Stripe*

- Developed a full-stack property rental platform with dedicated Tenant, Landlord, and Admin modules for efficient property and rental management.

- Integrated REST APIs, Google Maps, and Stripe to support location-based property discovery, backend communication, and secure online payments.
- Designed a scalable architecture using Firebase and backend services while delivering a responsive and intuitive mobile user experience.

BeanBloss | *Flutter, Dart, Firebase, REST APIs, Node.js*

- Built a modern coffee shop application featuring menu browsing, product categorization, cart management, and an intuitive mobile interface.
- Integrated Firebase Authentication and cloud services to provide secure user management and real-time data synchronization.
- Implemented responsive layouts, smooth navigation, and performance optimizations to deliver an engaging mobile experience.

Shoppie | *Flutter, Dart, Firebase, Cloud Firestore, REST APIs, Provider*

- Developed a feature-rich e-commerce application with product discovery, category-based browsing, product details, cart management, and checkout workflows.
- Integrated Firebase and REST APIs for authentication, product data management, and reliable synchronization between the mobile application and backend services.
- Implemented Provider-based state management, reusable widgets, and responsive layouts to maintain scalable code and deliver a smooth shopping experience.

Vibely | *Flutter, Dart, Firebase, REST APIs, Provider, Audio Services*

- Developed a modern music application with an interactive interface for discovering, browsing, and managing music content across multiple screens.
- Implemented audio playback workflows, dynamic content rendering, and state management to provide a responsive and consistent listening experience.
- Built reusable Flutter components and optimized navigation and application state to maintain clean architecture and smooth performance.

Fasolink | *Flutter, Dart, Firebase, REST APIs, Provider, Google Maps API*

- Developed a multi-service mobile application combining grocery shopping and service discovery within a unified and user-friendly Flutter interface.
- Built structured browsing, product and service details, cart functionality, and user interaction flows using responsive and reusable Flutter components.
- Integrated Firebase, REST APIs, and location-based services while applying structured state management for scalable application development.

Technical Skills

Languages: Dart, Java, Python, JavaScript, HTML/CSS

Mobile Development: Flutter, Responsive UI, Custom Widgets, Animations, Clean Architecture

State Management: Provider, BLoC, GetX, Riverpod

Backend & Services: Firebase, RESTful APIs, Node.js, MongoDB, SQLite, Cloudinary

Developer Tools: Android Studio, VS Code, Git, GitHub, Firebase Console, Postman

Other: AI Agent Integration, API Integration, Agile Development
